November 23, 2009

E-block

Total amount of money = \$4000

Airplane = \$1368.90

Hotel/Hostel = \$123 (6 Nights) + \$126.57(1 Night) + \$665 (7 Nights)

Bus (Round Trip) = \$5.45 x 2 (round trip)

Food = 14 Days x (3 meals x \$5)

Souvenir = \$13.61 (One Coffee pot)

Final Price

Airplane = \$1368.90

Hotel/Hostel = \$914.57

Bus (Round Trip) = \$10.9

Food = \$210

Souvenir = \$13.61

\$ Left over = Total amount of money – Airplane fee - Hotel/Hostel fee - Bus fee – Food -Souvenir

$\$4000 - \$1368.90 - \$914.57 - \$10.9 - \$210 - \$13.61 = \$1482.02$

With \$1482.02 I can live **41** more days in Dubai. When I leave **\$100** for Emergency, I can live **38** more days in Dubai.

After when I returned back to Dubai from Abu Dhabi

Go to the Al Sharq Hotel (Average \$20.5 per night)

$X \text{ days} \times (3 \text{ Meal} \times \$5) + \$20.5 \times X \text{ days} = \1482.02

$15X + 20.5X = 1482.02$

$X = 41.747$

If I leave \$100 for Emergency

$X \text{ days} \times (3 \text{ Meal} \times \$5) + \$20.5 \times X \text{ days} = \$1482.02 - 100$

$15X + 20.5X = 1382.02$

$X = 38.9301$
